

# LARGE - 120M LENGTHS

## INSPECTION CAMERA KIT PAN AND TILT 120M

PRICE **\$11999** INC GST

USED IN PIPE DIAMETERS  
**60MM TO 600MM**

### FEATURES

When self leveling camera heads won't do the job then this unit is for you!

Camera can be remotely controlled via the display monitor joystick which enables the user to pan the camera head 360 degrees and tilt it 180 degrees.

We've listened to customers requests and have made some improvements to our Pan and Tilt model. They include a built in 128GB solid state hard drive, improved camera head with pressure rating of 2bar, newly developed roller skids, text overlay unit with built in keyboard and a newly designed case and monitor.

The item listed here is the most up to date pipe inspection camera on the market

**Please note:** The monitor used in this pan and tilt system can work in conjunction with our other Camtek reels (custom made cable available on request)

**MONITORS CAN BE USED WITH ALL OF OUR  
SMALL, MEDIUM AND LARGE CAMERA REELS**
